

Introduction

The information given in the application section should be used as a guide only. The surest way of choosing the correct replacement part is to identify the reference of the part that is being removed from the vehicle.

However, as this information is not always readily available these listings give an indication of the vehicle applications appropriate for each MEI adjuster.

Where possible we have included on which axle(s) the adjuster is fitted and on which side of the vehicle:

Applications by Manufacturer - Bus

Manufacturer	Application	Model	Axle Number		Axle Side		MEI
BOVA	BUS	FUTURA	1		L		4W2505
